

Service Package

Silver Silver +

www.megger-service-excellence.com

- **Silver service package: Extended factory warranty with annual training seminars**
- **Silver + : The same as Silver package plus product calibration service**

For every Megger tester, we guarantee first-class workmanship using the best materials while your tester is used under normal operating conditions and properly maintained.

With a **Silver** service package, your warranty is extended beyond the factory warranty.

In addition, the package includes two training days a year for 1 person. Simply select the desired training session from our Power Training Catalog. Training and user topics are expanded and updated annually.

The **Silver +** package, expands the basic package to include a calibration service at our Aachen factory, which aligns the product with factory standards. It can be selected annually or biannually each time. Bespoke solutions are also available.

This allows you to keep your service and training costs under control at all times and to plan optimally.

You will receive an identification QR code for the device service package.
